Dear Colleagues,

Please find the details below for the 39<sup>th</sup> meeting of the SPE - Wellbore Positioning Technical Section / ISCWSA 9th May 2014 in Long Beach California USA.

When: **Friday 9th May, 2014**

What Time: **8:00 AM - 5:00 PM**

Where: **Hotel Maya, 700 Queensway Drive, Long Beach, California, USA 90802**

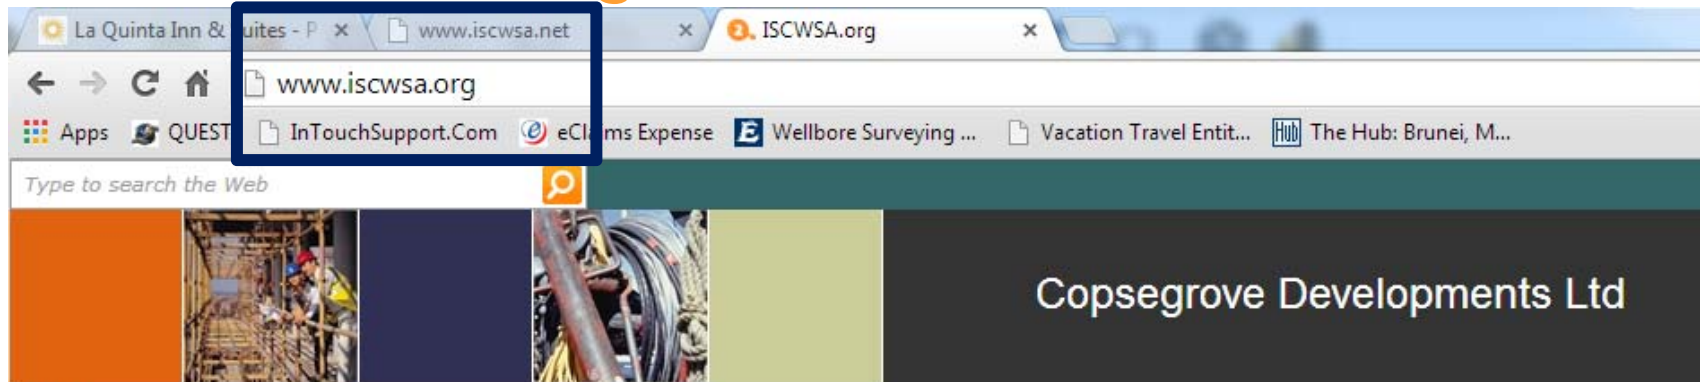

**Tel +1-562-435-7676**

### Register Now to Attend!

You won't want to miss the 39th meeting of the [ISCWSA](#) held May 9 in Long Beach, California, USA. It offers you the opportunity to share technical knowledge, meet colleagues from around the world, and gain insights from leading experts as you enjoy the sunny skies of California.

## The Industry Steering Committee on Wellbore Survey Accuracy

The Industry Steering Committee on Wellbore Survey Accuracy (ISCWSA) is seeking to dispel the confusion and secrecy currently associated with wellbore surveying and to enable the industry to produce consistent, reliable estimates of survey-tool performance in today's wells. This will be achieved through the production and maintenance of standards covering the construction and validation of tool error models.

Work focused initially on MWD systems. They provide a large proportion of the total directional survey data world-wide and, because of their similarities between suppliers, are more amenable to specification standardisation than other types of survey tool.

There is no formal membership of the Committee and its meetings are open to all who wish to attend. The committee has held 33 meetings to date.

The results of the work on an error model for a basic directional MWD service has been presented in SPF

[Welcome!](#)

**Welcome to the Wellbore Positioning Technical Section**

The Wellbore Positioning Technical Section has existed since 1995 as the Industry Steering Committee for Wellbore Surveying Accuracy (ISCWSA). The committee was established following the SPWLA Topical Conference on Measurement While Drilling, held in Kerville, Texas, USA, in late 1995 and became an SPE Technical Section in 2004.

**Mission**

- To produce and maintain standards for the industry relating to wellbore survey accuracy.
- To set standards for terminology and accuracy specifications.
- To establish a standard framework for modeling and validation of tool performance.
- To raise awareness and understanding of wellbore survey accuracy issues across the industry.

## Introduction to wellbore positioning - download

This industry standard publication (accepted by the ISCWSA board) is published through the UHI Research Office. The full eBook is available to view below. However, if you wish to download the latest copy for use on desktop, laptop, tablet or eBook reader then you can do this by choosing your preferred format below:

**Introduction to Wellbore Positioning (V01.05.14) pdf - 10MB**

zipped html version withdrawn - now old (version V01.7.12) and most tablets can handle pdfs fine.

**LATEST VERSION: V18.9.13**

Check version information at the bottom of this page.

*Please note - it is expected this publication will be added to and developed over time as techniques change newer technology is employed, please check this page regularly if it is important to you to have the latest version of the publication.*
